Define Problem Statements

PocketSmart AI – Smart Budget and Recommendation AI

Valliammal College for Women | Department of BCA

Priya (Team Leader), Saira Banu, Harinishree, Pooja Shree, Lavanya

Problem statement

Users often need to plan purchases or events within a fixed budget, but information is scattered and manually comparing options can be time-consuming.

Project problem

A single beginner-friendly web application is needed to accept budget, preferences and context, then generate structured planning and recommendation output using Generative AI.

Target users

Students, families and general users who want a structured budget plan for home interiors, parties or jewelry selections.
