Coding & Solution

PocketSmart AI – Smart Budget and Recommendation AI

Valliammal College for Women | Department of BCA

Priya (Team Leader), Saira Banu, Harinishree, Pooja Shree, Lavanya

Implementation

PocketSmart AI is implemented as a Python web application with HTML/CSS/JavaScript frontend components and a Gemini-powered service layer.

Major modules

• Home Interior Budget Planner

• Party Budget Planner

• Jewelry Budget Planner

AI integration

User requirements are converted into AI prompts and the generated response is returned to the application for display.

Security note

API keys are configured through environment variables and should not be committed to GitHub.
